

Chinese Portrait

«A map of the world that does not include Utopia is not worth even glancing at(..)»
Oscar Wilde

My name is Doris, I'm 24 and I'm a student in graphic design. For my final project, I decided to work on prison and reintegration and so, I would like to work with you.

Graphic design is about create and choose elements to achieve a means of communication and to give sense. From the poster to the book, passing by the fanzine, the web and many other things.

Here, I want to realize creative workshops which get as close as possible to what you are and what you want.

The idea is working on utopia and being able to express yourself.

This chinese portrait will allow me to create a personalized notebook. It will be linked with the workshops and will be yours.

Please write your first name on the cover and answer the questions. You can add details if you want to.
